

Your Carbon Snapshot

CONGRATULATIONS ! You have just accepted our challenge - and challenged your own household - to save on your energy bills and to help save our environment from the dangers of climate change.

YOUR 'BEFORE' SNAPSHOT

There's one important last step before you start - the BEFORE Snapshot of your recent energy use. At the end of the Challenge you'll compare this with an AFTER Snapshot to see how much energy your household actually saved.

Getting the Snapshot data may take a few minutes:

1. Check your latest Electricity and Natural Gas bills. They show the previous 12 months usage.
2. Check your Heating Oil or Propane bills to see your usage. Or phone your dealer for an estimate. Your auto service bills show the mileage. Find one a year back and estimate; or ask your service department to.
3. If finding your Snapshot numbers is a problem, email info@NeighborhoodEnergyChallenge.org or phone Don 10 am to 5 pm weekdays at 401-841-9810. We can help!

Please enter numbers with no commas.

For items marked * *Enter 0 if it does not apply.
Enter 1 if it applies, but you want to fill in the information later.*

- _____ Last 12 months **bb** used, including heat (kWh) *
(From page 2 of your most recent electric bill)
- _____ Last 12 months **bbused** (CCF) *
(From your most recent gas bill.)
- _____ Last 12 months **Heating Oil** purchased (gallons) *
(If you don't have your bills, call your supplier for the information.)
- _____ Last 12 months **Propane** purchased (gallons) *
(If you don't have your bills, call your supplier for the information.)
- _____ **Miles flown** by your household in last 12 months *
(Look up mileage at www.nwa.com/cgi-bin/wpmiles.cgi)
